Evaluations

Configuration	Chunk Size	Overlap	CSV Chunks	PDF Chunks
---------------	------------	---------	------------	------------

A	1000	200	2000	19
---	------	-----	------	----

B	500	100	4000	35
---	-----	-----	------	----

Configuration B generated more chunks and provided finer-grained retrieval.

Configuration A generated fewer chunks and preserved more context per chunk.

Configuration A was selected for the final chatbot because it balanced context retention and retrieval quality.

What is Supplier Watch List (SWL)?

Supplier Watch List (SWL) is a status assigned to suppliers whose Compliance Score is below 60 at any audit. Being on SWL status limits new purchase order (PO) issuance to 20% of the prior quarter's volume. It serves as a mechanism to monitor and manage suppliers that may not meet compliance standards.

What is a Level 3 disruption response?

A Level 3 disruption response applies to high-risk suppliers with any disruption flag or any supplier with two simultaneous disruption flags. The response includes the following actions:

- Immediate escalation to the Chief Procurement Officer (CPO).
- Activation of an alternate supplier for a minimum of 40% of volume within 10 business days.
- Adjustment of safety stock by

What is the Tier-2 defect rate limit?

The maximum defect rate allowed for Tier-2 suppliers is 2.50%.
